

BRIGAIID

BRIDGING THE GAP FOR INNOVATIONS
IN DISASTER RESILIENCE

OUR AIM IS TO PROVIDE STRUCTURAL AND ONGOING SUPPORT FOR INNOVATION CLUSTERS:

offering solutions for climate adaptation by developing an innovative mix of methods and tools, to become a standard for climate adaptation innovations.

BRIGAIID'S ROADMAP

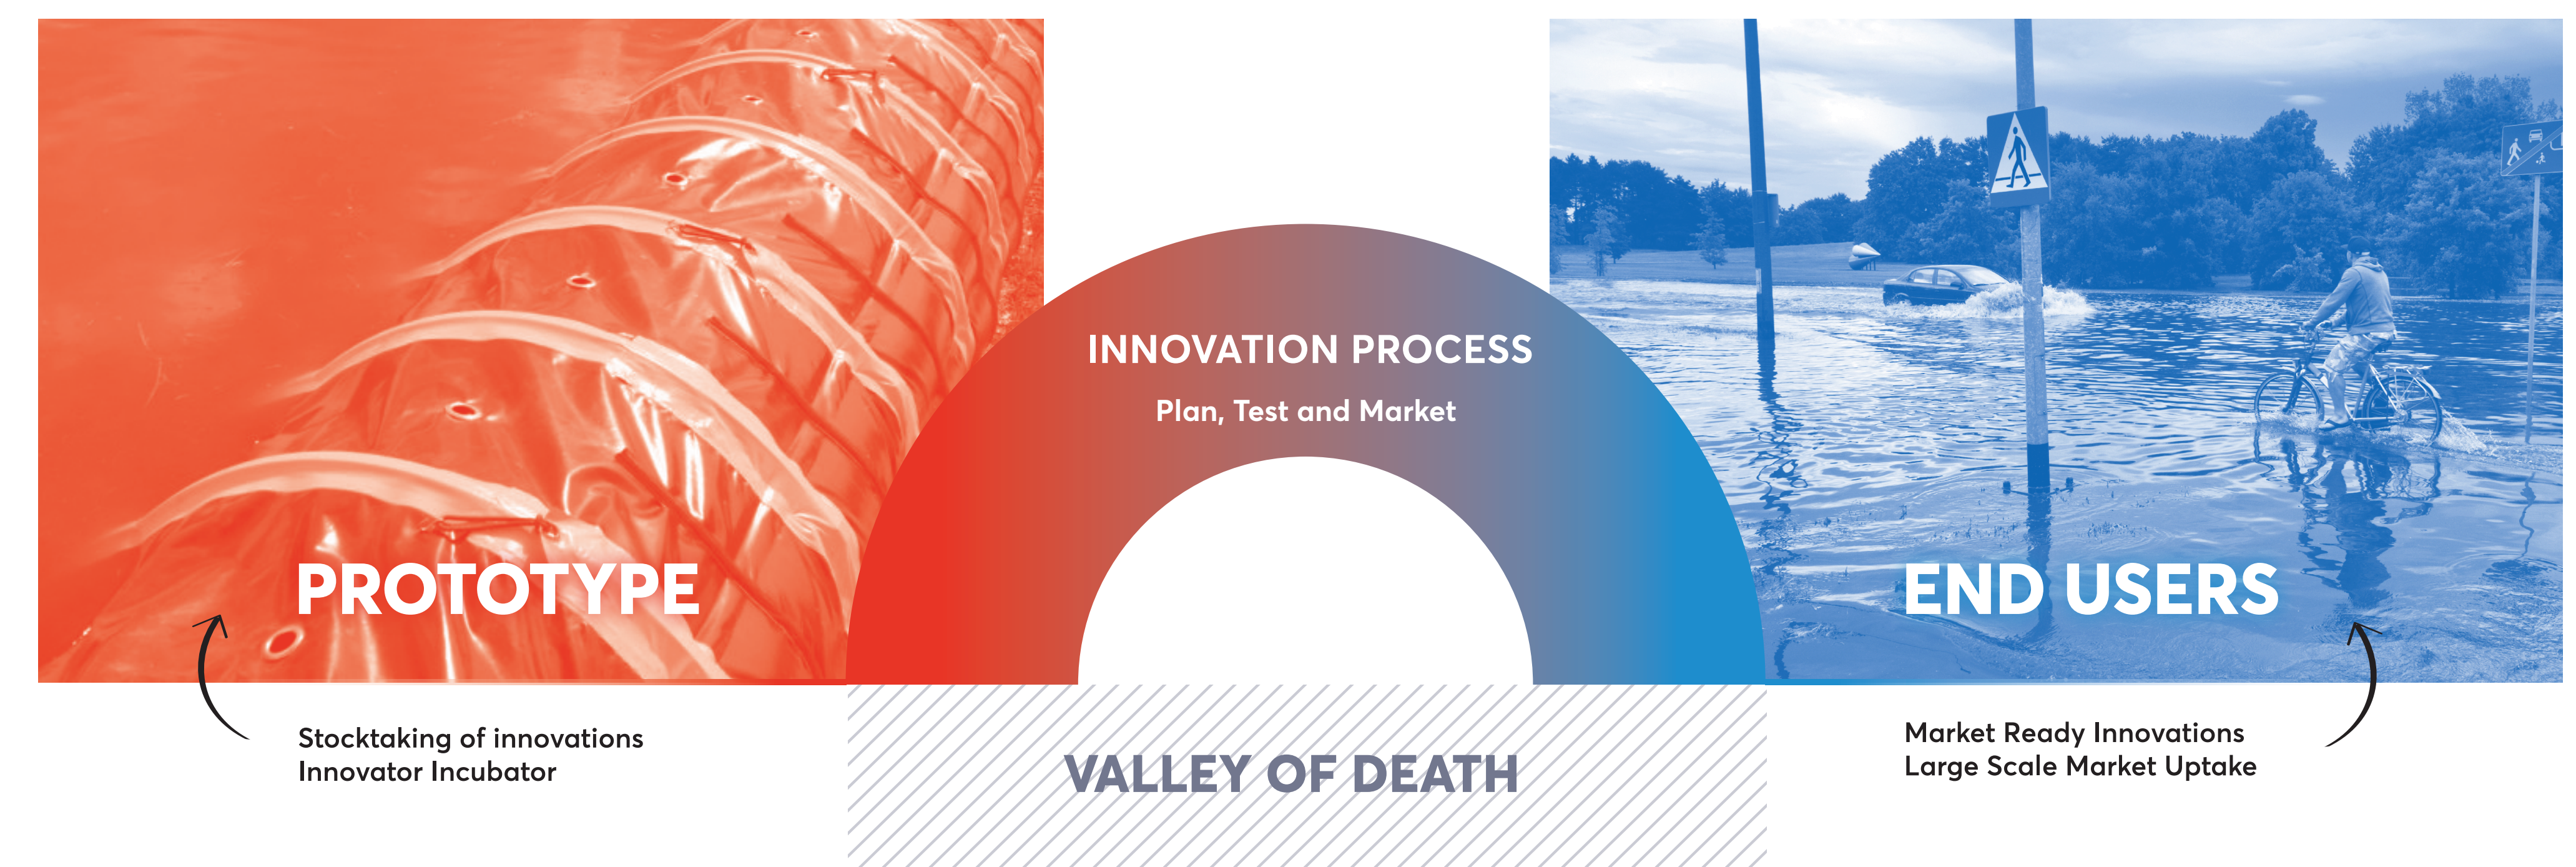

- 1 **IDENTIFY** 75-100 existing innovations (TRL 4-8) on floods, droughts and extreme weather.
- 2 **SELECT** the most promising 35-50 innovations for further testing, validation and demonstration.
- 3 **IMPROVE** these innovations.
- 4 **SELECT & SUPPORT** the 20-30 most promising innovations for market introduction.
- 5 **ESTABLISH** this process to make it an ongoing, structural activity beyond BRIGAIID's life time.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 700699.

BRIGAIID'S APPROACH

BRIGAIID clears the path to deliver innovations on floods, droughts and extreme weather to the market through the assessment and improvement of:

Technical + Social + Market Readiness

By advancing these three factors simultaneously, BRIGAIID smoothens the development path, because technical, social and market requirements can be incorporated in the design, business model and market approach early on.

**BE PART OF
BRIGAIID, AND
COME TO OUR
CONFERENCE
IN VENICE**

**November 9th-10th
2017**
