

BRIGAIID'S THIRD AND FINAL OPEN CALL FOR INNOVATIONS

**Are you an innovator
involved in climate
adaptation?**

**Does your innovation
mitigate the impacts of floods,
droughts or other extreme
weather events?**

**Are you eager to improve
your innovation, make it fit with
needs of end users, and meet
with prospective clients?**

**We welcome you to submit your innovation to
BRIGAIID's third and final call for innovations!**

**Interested? Contact us before 15 August 2018 at:
climate-innovation@brigaid.eu**

Shortly describe your innovation and ambitions for testing and improvement.

The BRIGAIID team will contact you to explain next steps and guide you in registering your innovation at www.climateinnovationwindow.eu.

From the submitted innovations BRIGAIID will select 6 to 9 innovations and provide them with funding and support for testing and improvements.

During this final call BRIGAIID especially welcomes nature based solutions, but other solutions are also eligible.

Minimum requirements of innovations:

- has been developed by an innovator with legal representatives in a EU or associated country
- mitigates impacts from floods, droughts or extreme weather events
- is at a technical readiness level (TRL) of 4 or higher (i.e. a prototype has been developed and is ready for further testing in the lab or field)
- is a structural, software or nature based solution

**BRIGAIID is a 4-year project under EU Horizon 2020 (2016-2020).
We aim to effectively bridge the gap between innovators and end-users
in resilience to floods, droughts and extreme weather.**
